(a) Automatic class of failed answers
right shape, wrong values
wrong shape (rows or columns)
empty result
extra rows (superset)
missing rows (subset)
execution error
columns permuted
timeout
reference query fails
0
50
Share of failed answers (%), development set
single call (504 failed)
fixed loop (492 failed)
(b) Model-based failure annotation
L6 reference query suspect
L1 schema linking
L3 filter or value
L4 aggregation, grouping, order
L8 other
L7 ambiguous question
L5 wrong criterion
L2 join path
single call (n = 157)
fixed loop (n = 143)
